

INCREASE YOUR PROFITS & EXPAND YOUR SKILL SET

EASILY CREATE BETTER LIVING, LEARNING, AND WORK ENVIRONMENTS

ACOUSTIC

TACKABLE

Customers are demanding more from their walls. Not only do they want their walls to look good, they want their walls to be useful.

With Fabricmate, you can offer Impact Resistance, Acoustics, Tackability, and Thermal Benefits, all while reducing maintenance costs and looking great.

GRAPHIC

CAPTURE THE NEW DEMAND

Paint may dominate the market now but that's changing. Get on board with this superior alternative.

WALL FINISHING REDEFINED

The Fabricmate Wall Finishing System is a sustainable, high-performance, stretched-fabric system unlike any you've seen before.

THE FABRICMATE GUARANTEE

Enjoy the peace of mind that comes with using an innovative product backed by an industry leading lifetime warranty.

MORE THAN A WRAPPED PANEL

Unlike traditional wrapped panels, with our VOC-free Site-Fabricated System there is no need to field measure and no long lead times.

ACOUSTIC

- Absorbs Reverberated Sound
- Enhances Speech Intelligibility
- Resists Sound Transmission

TACKABLE

- Holds Tighter Than Cork
- Won't Break Down or Crumble
- Naturally Self-Heals

WALL PROTECTION

- Tougher Than Painted Walls
- Impact Resistant / Shock Absorbant
- Shatter-Resistant Frame

FLOATING FABRIC

- Allows Fabric to Bounce Back from Impacts
- Mitigates Visible Damage
- No Glue or Adhesives

CHANGEABLE

- Fabric Can Be Easily Replaced
- Reduce Maintenance Costs
- Reduces Waste

SUSTAINABLE

- 65%-96% Post-Consumer Content
- 100% Recyclable
- VOC Free

MAGNETIC | THERMAL | FIRE-RATED | NON-ABSORBENT | NON-TOXIC | SAFE-TO-HANDLE | CUSTOMIZABLE

The market for beautiful, acoustic, functional, and sustainable wall coverings is expanding at an amazing rate. Our systems are easy-to-learn, easy-to-install, and very well received. The Fabricmate Wall Finishing System is so simple it only takes

a day or two to train an installer. This can open a whole new market of potential customers looking to not only enhance the looks of their walls, but also add functionality and benefits that continue giving back for years to come.

Join us via Webinar or at our Training Facility in sunny Ventura, CA where we will provide you with the training and expertise to get you started. No licensing fees, contracts, or up-front costs.

FABRICMATE VS TRADITIONAL OPTIONS

FAST & EASY INSTALLATION | SHORT LEAD TIMES | NO NEED TO FIELD MEASURE

Bare painted walls can be an acoustic nightmare. They cause sound to reverberate, making it difficult to hear clearly. Our Wall Finishing Systems are proven to significantly reduce these common acoustical problems and enhance speech intelligibility; which is one of the primary reasons so many Homeowners, Businesses, and School Districts are using Fabricmate Wall Finishing Systems.

Our Panels and Systems make a great alternative to standard fabric-wrapped (glued) yellow glass panels. Unlike fiberglass panels, the fabric is not glued to the surface. With our System, the fabric is held in place by the frame and floats freely over the surface, hiding any damage that can occur with normal wear and tear. If the fabric become worn or soiled, it can be easily changed without having to replace the full panel.

One of the best things about our System is it's versatility. It can conform to nearly any architectural feature and naturally adjusts to out-of-true conditions. It easily incorporates different materials and allows creativity in design without hindering ease-of-installation. Whether you're looking at new construction, tenant improvements, or a simple remodel, the Fabricmate Wall Finishing System is the ideal solution. Contractors and DIYers alike have been installing our systems for decades in commercial and residential applications including businesses, schools, hotels, hospitals, medical offices, home theaters, churches, basements, and many more.

LEARN BEST LAYOUT PRACTICES

While there are no limits to the creativity you can achieve with our systems, there are layouts that are typical for most situations. We've taken the time to spec & draw them out to make the design process smoother.

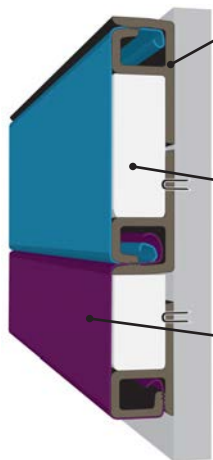

SAMPLE/SUBMITTAL & SUBSTITUTIONS

We will assist you with project submittal samples and provide support for substitution requests.

FREE VALUE ENGINEERING

We are here to help you make every job a success with free bid assistance and value engineering.

A SIMPLE 3 COMPONENT SYSTEM

FRAME

The Frame outlines the Panel or Full-Wall Installation and holds the Fabric taut across the surface of the Backing.
Available in multiple styles, thicknesses, and curvable Flex-Frame

BACKING

A Backing, such as ReCore® provides shock absorbency, tackability, and sound absorption.
Safe to handle. Made from recycled water bottles

FABRIC

Fabric is inserted into the Frame jaws and is held taut over the surface of the Installation.
We offer pre-tested Fabrics as well as Custom Graphic Printing
